

9 Year Parent Booklet Data Coding

Entries in red denote variable names and value coding used in the analysis dataset.

Entries in blue denote variable names and value coding used in the raw data, where this differs from the dataset.

This document was created on 27 February 2008 and last updated in July 2022.

Notes:

1. The layout and formatting of the booklet have been somewhat modified in order to accommodate annotations of variable names and value codes. However, the wording of questions and responses is unchanged. The front and back covers (including the "TEDS Contact Help" sheet on the back) were removed before data entry, so they are not shown in this document.
2. This document shows item variables, not derived variables; however, in some cases the item variables have been recoded or restructured from the raw data, and annotations show where this has been done.
3. In almost all cases, the variable names in the analysis dataset (starting with 'ip') are the same as the variable names used in the raw data. Therefore, the variable names are not duplicated for dataset and raw data, except where some change has been made.
4. In nearly all cases, the value coding in the raw data is the same as that in the dataset, in which case the coding is shown in the red font only.
5. In a few cases, the variable name or value coding in the raw data differs from the coding in the dataset, in which case the raw data variable/coding is shown in blue in addition to the dataset variable/coding shown in red.
6. In the cleaned raw data, a 'missing' response is coded as -99 and 'not applicable' is coded as -77. However, in the analysis dataset these are all recoded to missing values.
7. The booklet contained several text-response questions in the first few pages. These have not been retained in the raw data, therefore they are not annotated in this document. Where text responses were coded into numeric values, this is explained in this blue font.
8. The parent booklet contains many twin-specific items, where the parents are asked questions about the elder and younger twins separately. In the raw data, for twin items, variable name suffixes "1" and "2" refer to the elder and younger twin respectively.
9. In the analysis dataset, all twin-specific items are double-entered with a row of data for every twin. Here, variable name suffixes "1" and "2" refer respectively to twin and cotwin, not to elder and younger twin.

PARENT QUESTIONNAIRE

Thank you for taking the time to complete this questionnaire. All your answers are strictly confidential. You will have seen many of these questions before but please answer every question: it is very important that we keep this information up-to-date.

Please indicate your answers with a cross using BLACK ink.

If you make a mistake, shade out the box completely and cross the right one

6. Have there been any major changes or difficulties in your financial circumstances over the last two years? **ipfinchg:** Yes 1 No 0

If YES, would you describe your financial situation now as... **ipfindif:**

Better 1 Worse 2 Same 3

These two raw variables have been combined into a single dataset variable describing changes in financial circumstances:

ipfinchange:

- 0=no change or difficulty
- 1=yes but same financial situation
- 2=yes, worse financial situation
- 3=yes, better financial situation

7. Do either of the twins have...? (Please cross as many boxes as you need to)

All except 'other' are coded as 1=yes (ticked), 0=no:

	Elder Twin	Younger Twin
Hayfever iphayfv1/2:	<input type="checkbox"/> 1	<input type="checkbox"/> 0
Nut allergy ipnutal1/2:	<input type="checkbox"/> 1	<input type="checkbox"/> 0

Other ipothal1/2:	<input type="checkbox"/>	<input type="checkbox"/>
See coding below		

If other allergy, please describe:

Originally recorded as text, any responses have been coded into the variables above. The text has not been retained in the data.

Coding for **ipothal1/2:**

- 0=no
- 1=antibiotics (penicillin or other)
- 2=animals, fur, insect bites (including specific animals like cats, horses)
- 3=skin contact including detergents, face paints, plasters, sun cream, grass
- 9=miscellaneous others

8. Do either of the twins have any (difficulties with their learning?)

iplrndif: raw responses coded 1=elder only, 2=younger only, 3=both, 4=neither

Recoded in dataset to

iplndif1/2: separate variables for each twin, coded 1=yes 0=no.

Yes, elder twin Yes, younger twin Neither twin

If YES, do either of them have one or more of the following? (Please cross as many boxes as you need to)

The following are all coded as 1=yes (ticked), 0=no:

There were very few separate responses for "autism" and "Asperger's", so these were combined into a single variable (*ipldaut1/2*):

	Elder Twin	Younger Twin
Diagnosed autism <i>ipldaut1/2</i> :	<input type="checkbox"/>	<input type="checkbox"/>
Diagnosed Asperger's syndrome <i>ipldaut1/2</i> :	<input type="checkbox"/>	<input type="checkbox"/>

Difficulties in learning to write <i>ipldwri1/2</i> :	<input type="checkbox"/>	<input type="checkbox"/>
Difficulties in fine/gross motor skills/co-ordination (e.g. dyspraxia) <i>iplddsp1/2</i> :	<input type="checkbox"/>	<input type="checkbox"/>
Difficulties in maths <i>ipldmth1/2</i> :	<input type="checkbox"/>	<input type="checkbox"/>
Difficulties with speech or language <i>ipldlan1/2</i> :	<input type="checkbox"/>	<input type="checkbox"/>
Difficulties with hearing <i>ipldhea1/2</i> :	<input type="checkbox"/>	<input type="checkbox"/>
Problems with eyesight <i>ipldeye1/2</i> :	<input type="checkbox"/>	<input type="checkbox"/>
Difficulties with spelling <i>ipldsp11/2</i> :	<input type="checkbox"/>	<input type="checkbox"/>
Falling behind generally in school <i>ipldfal1/2</i> :	<input type="checkbox"/>	<input type="checkbox"/>

Does either twin have a Statement of Special Educational Needs (SEN)?

ipsen: raw responses coded 1=elder only, 2=younger only, 3=both, 4=neither

Recoded in dataset to

ipsen1/2: separate variables for each twin, coded 1=yes 0=no.

Elder twin Younger twin Neither twin

Is either twin currently on the Special Educational Needs Register?

ipsenreg: raw responses coded 1=elder only, 2=younger only, 3=both, 4=neither

Recoded in dataset to

ipsenrg1/2: separate variables for each twin, coded 1=yes 0=no.

Elder twin Younger twin Neither twin

9. Now we are going to ask briefly about any changes or events that have had an impact on the family. Thinking back over the last TWO years, could you tell us if any of the following major changes or particular events have occurred?

All coded as 1=yes (ticked), 0=no (not ticked),
 Except for "other" ipleoth (see coding below).

Note that hospitalisation of twins (iplehos1/2) have been double entered like other twin variables.

	Yes		Yes
Hospitalisation of a elder twin iplehos1/2:	<input type="checkbox"/>	Hospitalisation of a younger twin iplehos1/2:	<input type="checkbox"/>
Hospitalisation of parent iplehosp:	<input type="checkbox"/>	Hospitalisation of sibling iplehoss:	<input type="checkbox"/>

		0=no,	
		1=family member moved away,	
		2=death of pet,	
		3=bullying or harrassment	

If "Other", please describe: Originally recorded as text, many responses fell into the categories above and were recoded accordingly. Other responses were recoded into the numeric categories shown above for variable ipleoth.

* There were negligible responses for 'death of parent' and 'death of sibling'. Any such responses have been recoded into 'death of other close relative' (ipledtho).

10. Do you have access to the Internet at home? **ipintrnt:**

ABOUT SCHOOL

We would like to know about your twins' **classrooms** and **school friends**. Although some questions may appear similar, please do your best to answer all, as there are subtle differences. We know that some will be difficult to answer, but we are interested in your perceptions, so please let us know what you think. For each item, please mark the box for **Certainly true**, **Somewhat true**, or **Not true**.

The classroom is a place where:

ABOUT BEHAVIOUR

We would like to know about your twins' behaviour – how they act, think and feel. Here are some descriptions of children. Please tell us if you think each statement is **Certainly true**, **Somewhat true**, or **Not true** for each twin in turn. When you answer think about their behaviour over the last SIX MONTHS.

The About Behaviour section includes items from many different measures. In the raw data, the variables all have prefix "ipbh" and are numbered consecutively as presented in the questionnaire.

For the dataset, the variables have been renamed with prefixes representing the measures as follows:

- SDQ: ipsdq (with an additional prefix per/emo/con/hyp/pro for the subscale)
- CAST: ipcas
- APSD: ipaps
- Proactive aggression: ippag
- Reactive aggression: iprag
- Anxiety measures: ipanx
- ODD: ipodd
- Emotional intelligence: ipemi
- Cognitive ability: ipcoga

The variable numbering within each measure is consistent for equivalent items in the twin and teacher questionnaires at age 9 (CAST, ODD, Emotional intelligence, cognitive ability) and also for equivalent items in the same measure at other ages (SDQ, APSD, anxiety). The numbering is therefore not necessarily consecutive and does not represent the ordering as presented below.
