Dear <forename>,

Thank you for your interest in taking part in our TEDS Parents DNA Study.

Enclosed is a pack for collecting the DNA, which involves providing a saliva sample in a plastic tube. It is very simple and quick to do. The enclosed instructions page explains how to do this in more detail. You can send the tube back to us in the freepost envelope. Once it reaches the labs, the DNA will be extracted from the nuclei of cells in the saliva.

Any information you give us will be treated as strictly confidential. If you would like any more information or if you would like to discuss this study further, please get in touch (contact details above) and we will be happy to help.

Please make sure that you **send back the consent form with the tube** – if we do not have your signed permission, we can't use the DNA you are kind enough to send us.

**To thank you for taking the time to help us with this important research we will send you a £10 electronic Love2Shop voucher once we have received your saliva kit.**

Many thanks for your support for our research.

Yours sincerely,

TEDS Team
